How to Write an Abstract for the Conference on High Performance Scientific Computing

N. H. Dien[1], **T. D. Phuong**[2], and **<u>T. H. Thai</u>**[3]

Abstract: This text is a style example for abstracts of the International Conference on High Performance Scientific Computing (March 10-14, 2003, Hanoi), which must be written in LaTeX-format, not to exceed one A4-page, and transmitted electronically or sent as files in a diskette. You can load the needed style file `abs4hpsc.sty` and this example file `abs4hpsc.tex` from our Web-page or ask us to send them to you. It is recommended to copy this LaTeX-file and modify it by your new content.

The title and the list of author's must be placed between the brackets `{ }` after the command `\newtitle` or `\newauthor`, respectively. For long title and long list, use `\\` to demand line breaking followed by `\medskip` to have a suitable skip. The author who will actually give the talk is marked by an underline (`\underbar{ }`). The upper index after every author's name made by a number in the brackets `{ }` after the command `\no` following the name is to indicate the corresponding address in the list at the end. To make this list, you have to use the command `\newaddress{ }` and the environment `itemize` with `\no{ }` in the bracket of `\item[ ]`. For instance, the list of addresses at the end of this text is written by

```
\newaddress{
  \begin{itemize}
    \item[\no{1,2}] Department of ... and Scientific Computing \\
      ...
      {\it nhdien@thevinh.ac.vn, tdphuong@thevinh.ac.vn}
    \item[\no{3}] Interdisciplinary Center ... Heidelberg\\
      Im Neuenheimer Feld 368, 69120 Heidelberg, Germany\\
      {\it thai@iwr.uni-heidelberg.de}
  \end{itemize} }
```

Please use `{\it ...}` for e-mail address.

The proper content of abstract starts with the command `\newabstract`. To begin a new paragraph just add a blank row in LaTeX-file without any skip command.

[1,2] Department of Numerical Analysis and Scientific Computing
Institute of Mathematics, National Center for Sciences and Technoloy
P. O. Box 631 - Bo Ho, Hanoi, Vietnam
